

Precision by top quality

HSB **NORMALIEN**[®]
high quality components

Precision by top quality

We have been active in the field of standardized tools for mould and die making for over 30 years. Fast scheduling, high availability of products through our well-assorted stock, reliable delivery and highest quality lead to the success of our manufacture customers in tool and mould manufacture. A large number of regular customers confirm this.

Special processing/ Measurement

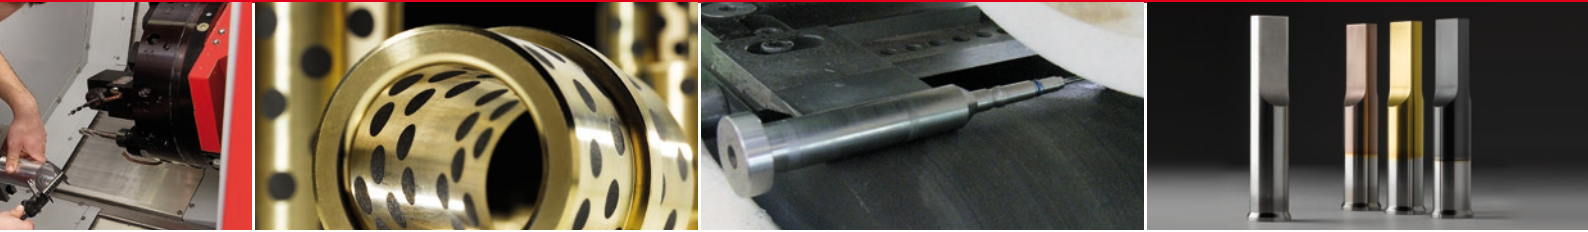

Special parts are manufactured according to your drawings and requirements. Special blade ejector, mould cores and round parts, all custom-made and produced to the highest quality. The manufacturing excellence starts with the HSB standard components and carries through to all custom parts using state-of-the-art measuring devices.

Production at the highest quality level

Standardized procedures and processes in accordance with DIN ISO 9001:2008 certified products are set for the individual product areas and thus guarantee smooth production.

Special parts such as punches, mechanical parts and customized contours
